Precipitation probability					
<05%	<05%	<05%	20%	40%	50%

Forecast for Thursday 22 Sep 2022

Weather: A largely cloudy and dry start though there is a chance of some early morning mist and fog. Any mist and fog will clear quickly, leaving some bright spells by late morning before cloud will thicken later on as a cold front approaches the park from the northwest. It will arrive during the late afternoon, bringing outbreaks of rain, likely heavy at times through the evening.

Chance of cloud-free hill tops above 600m: 70% becoming 30% in the evening.

Low cloud and visibility: Chance of cloud bases around 400m at dawn, but quickly lifting. After mid-morning, bases lift to above the summits until early evening when they will drop again as the front arrives, with cloud bases widely dropping to 300-400m. This will bring fog to many of the summits. Very poor visibilities within any fog. Poor to moderate visibilities expected within rainfall. Good visibilities at times away from any fog or rainfall.

Freezing Level*	2300m	2200m	2600m	2800m	2700m	2600m	2400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds picking up through the morning, including gusts, particularly near the summits. This could be dangerous on exposed ridges and in cols. Be ready to descend off any higher ground or exposed routes as needed and prepare alternative routes where necessary.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Thu 22 Sep 2022	0mm	0mm	0mm

Forecast for Friday 23 Sep 2022

Weather: Some patchy drizzle and cloud to start as the front clears away quickly, leaving a risk of showers earlier on Friday then becoming drier during the afternoon. There could be an isolated heavy shower. There will be some cloud at times, but plenty of sunny spells in between. Feeling fresher than of late in a northerly to north-westerly breeze.

Maximum wind: North to north-westerly, gusts of 10-15mph.

Chance of cloud-free hill tops 600m: 80%

Low cloud and visibility: Some of the higher summits will see some low cloud/fog through the morning, with bases of 300-400m first thing as the front clears away. Very poor visibilities within any fog. For the rest of the day the cloud should remain above the summits. Moderate visibilities expected within any showers. Good visibilities expected otherwise, with very good air clarity, allowing distant hills to be seen.

Temperature: **Valleys:** Plus 8 Celsius to Plus 15 Celsius
At 600m: Plus 7 Celsius to Plus 13 Celsius
Freezing level: Above the summits.
